

PILLAR 04 - ARRIVAL & CHECK-IN

The first few minutes in your office set the tone for the visit.

A FINDING YOU

Are the building, suite, and entrance easy to find, with clear signage?

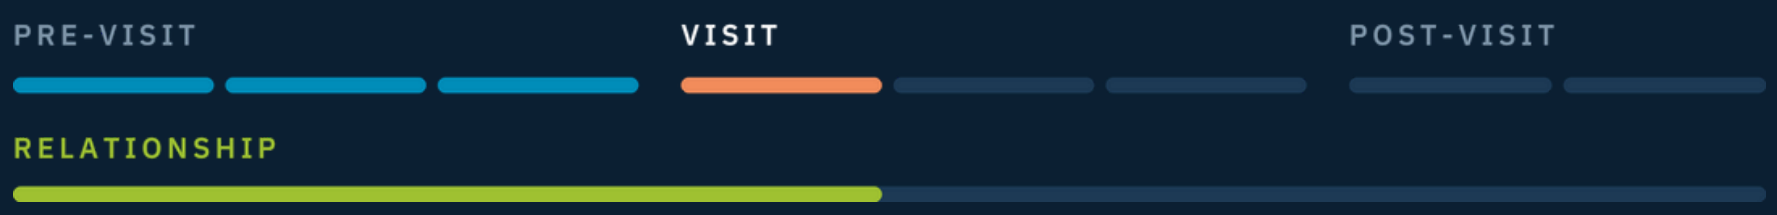

B BEING ACKNOWLEDGED

Are patients greeted promptly, even when the front desk is busy?

C CHECKING IN

Is check-in efficient, private, and free of repeated paperwork?

Patients judge how you'll care for them by *how you receive them.*

PHASE 04 - ARRIVAL & CHECK-IN

Where Arrival & Check-In *breaks down*

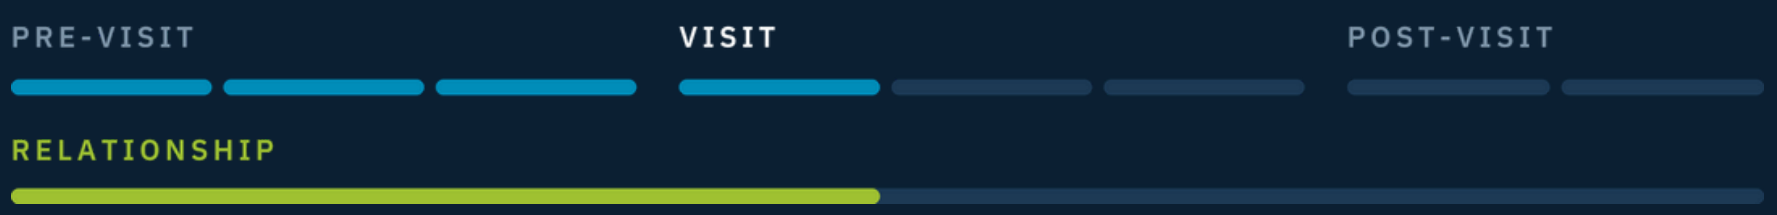

1
ACCESS PROBLEM
Signage, parking, or suite numbers have patients lost before they reach the door.

2
WORKFLOW PROBLEM
Staff juggle phones and check-in at once, so patients stand waiting unacknowledged.

3
COMMUNICATION PROBLEM
No one tells patients how long the wait will be, or why.

4
HANDOFF PROBLEM
Information collected before the visit is asked for again at the desk.

A waiting room with no updates *feels longer than it is.*

YOUR DIAGNOSTIC

Check your own practice.

Q1 Walk in as a first time patient. Is every turn from the parking lot to the desk clear?

Q2 How long does it take for someone to acknowledge a patient who walks in?

Q3 What do patients have to repeat at check-in that you already asked for?

Q4 When you're running behind, how and when do patients find out?

Patients should never have to wonder if anyone knows they're here.

Not sure where to start? The **PX360 Assessment** evaluates the patient experience across the full journey.
