A PATIENT JOURNEY DIAGNOSTIC

Where Is Your Patient Experience Actually *Breaking Down?*

You've seen the Nine Pillars. Now It's time to look at your own patient journey.

HMCG - NINE PILLARS OF PATIENT EXPERIENCE ™

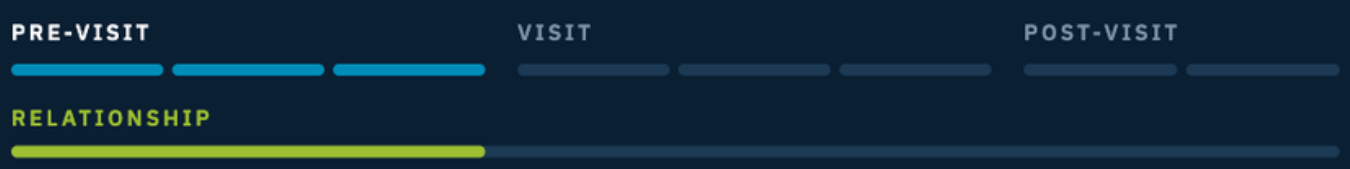

Your *"patient experience problem"* may be an operational problem.

You may have an:

- Access problem
- Workflow problem
- Follow-up problem
- Communication Problem
- Handoff problem
- Financial clarity problem

Patient experience is where patients *feel* your operational problems.

HMCG - NINE PILLARS OF PATIENT EXPERIENCE ™

PHASE 01 - PRE-VISIT

Where does the experience break before the patient arrives?

01 **INITIAL EXPOSURE**
Can patients understand who you are, what you do, and how to take the next step?

02 **INQUIRY & SCHEDULING**
Can they reach you and get an appointment without unnecessary friction?

03 **PRE-VISIT COMMUNICATION**
Do they know where to go, what to bring, and how to prepare?

Confusion before the visit becomes *friction during* the visit.

HMCG - NINE PILLARS OF PATIENT EXPERIENCE ™

PHASE 02 - VISIT

What happens once the patient reaches you?

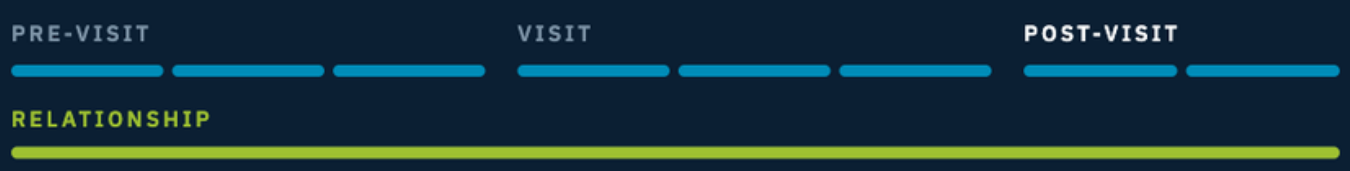

04 **ARRIVAL & CHECK-IN**
Can they find you? Are the acknowledged? Is check-in efficient?

05 **CLINICAL ENCOUNTER**
Do they feel heard, respected, and clear about their care?

06 **CHECKOUT & EXIT**
Do they leave knowing what happens next?

A great clinical encounter *cannot compensate* for a broken surrounding experience.

HMCG - NINE PILLARS OF PATIENT EXPERIENCE ™

PHASE 03 - POST-VISIT

What happens after the patient walks out the door?

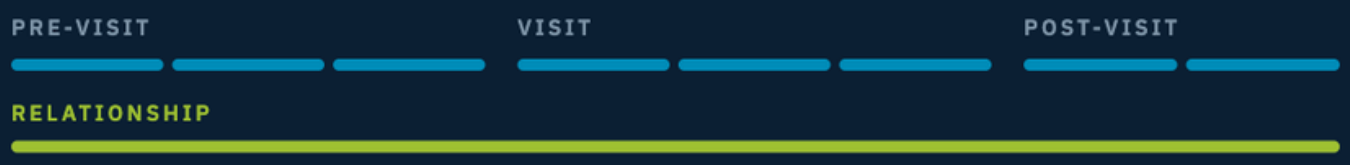

07 **CHECKOUT & EXIT**

Are the results, questions, referrals, and next steps handled reliably?

08 **BILLING**

Can patients understand what they owe and why?

The experience continues *long after* the appointment ends.

Pillar Nine tells you how well the first eight are working together.

THE LONG-TERM PATIENT-PRACTICE RELATIONSHIP

Trust • Retention • Loyalty
Advocacy • Referrals

Patients experience the journey as one relationship, not nine separate departments.

YOUR DIAGNOSTIC

So where is your experience breaking down?

Q1 Where do patients have to work harder than they should?

Q2 Where does your staff repeatedly have to explain, apologize, fix, or work around the process?

Q3 Where do patients have to work harder than they should?

Q4 Where do patients have to work harder than they should?

That's where I would start.

Not sure where to start? The **PX360 Assessment** evaluates the patient experience across the full journey.
